

Snapper

Pagrus auratus

Also known as:

Tamure, Bream, Schnapper, NZ Golden Snapper, Brim

Average Weight:

1-2.5kg

Average Length:

30-50cm

Fishing Areas

The snapper fishery is one of the largest and most valuable coastal fisheries in New Zealand. It is also the largest recreational fishery in the country.

2016 Catch Quantities:

The Commercial harvest limit

6,357tn

The Commercial catch

6,233tn

QMS Managed:

YES

MOST RECENT ASSESSMENT

July 2017

MANAGEMENT AREAS ASSESSED

1, 2, 7 & 8

Fishing Season: Year-round

Fishing Methods

Trawl

Seine

Hook & Line

SUSTAINABILITY

The purpose of New Zealand's fisheries law is to provide for the utilisation of fisheries resources while ensuring sustainability.

Under this law, utilisation means conserving, using, enhancing, and developing fisheries resources to enable people to provide for their social, economic, and cultural well-being.

The rights and allocations for commercial fishers are therefore considered in a wider environmental, social and economic context for the benefit of New Zealand, not just fishing companies.

40%

An estimated 40% of the total snapper catch is taken by recreational, non-commercial fishers.

SUPPLY CHAIN

The legal right to fish and obligations for accurately reporting fishing activities in New Zealand are tightly controlled.

The seafood industry is held accountable for accurately reporting their catch, balancing their catch against harvest allocations, ensuring they hold valid fishing permits and registering their vessels. Oversight and enforcement is provided by the Government.

1,165

There are 1,165 registered commercial fishing vessels in New Zealand, ranging from row boats to factory trawlers.

WORKFORCE

Compliance with legal requirements provides the minimum standard for fisher compensation and working conditions. The New Zealand seafood industry is required to comply with all relevant legislation relating to the human rights, employment and safety of fishers. These rights and protections are specified through 13 Acts of Parliament and administered through 7 regulatory agencies. Criminal penalties can and do apply for breaches of law.

13

The livelihood of fishers at sea is protected through 13 Acts of Parliament and administered through 7 regulatory agencies.

RISK SCORE SUMMARY

A summary of the seafood risk assessment scores is provided below.
